NEW CONCEPTS

HYBRID STRETCH

Hybrid stretch is a new technology based on an innovative spinning technique blending cotton with different types of stretch fibers, resulting in high stretch and superior recovery.

The fabric is tightly woven, yet lightweight and soft. It will feel as a second skin and never wear out.

Ideal for slim silhouettes and perfect shape retention: no bagging, no sagging.

Q. NORMA JEAN

A R T denim

Always The Right Temperature - denim

This new denim concept will keep you comfortable wherever you go. It is based on a phase changing technology which has been incorporated into a fabric that will stretch and enhance the sensation of well being even more.

Micro capsules store the excess heat and release it back to the body when it gets too cold. No shiver, no sweat: Always the Right Temperature.

Ideal for clean, dark and sophisticated silhouettes.

Q. SHIELD

MAGIC BLACK COL 860

Colour 860 is a black (yarn dyed) colour made out of a mix of well chosen dye stuffs giving a deep and rich black that washes down to a blue-ish grey just with a simple hypchlorite bleach. Normally a hypochlorite bleach turns the black into a dirty brownish grey. This magic black also gives beautiful results in bleach washes where the garments are tied.
